Re: Letter of Recommendation

Dear Tom,

Since you first built our house at 509 Dante Street, Venice, FL in 2010, the quality of construction and overall design has exceeded our expectations. Your stem wall construction really made the difference eliminating the traditional issue of settlement cracks in Florida homes built on sand. The things you did during construction go beyond Florida and City code, and we feel very safe to be able to withstand the Florida weather.

Kathy enjoyed working with you and you were very understanding in the design changes over the course of the construction. Your attitude is great and you take pride in your product. The house was built well within the time expectations and there were no financial surprises. We have built 5 homes during our 35 years of marriage, and this was the best overall experience with a builder.

Please share this Letter of Recommendation with prospective clients, and encourage them to call, and they can visit our home to see first hand the quality and attention to detail you put into your homes. We have never been more pleased with a house that Kathy has made into our home.

Sincerely,

Bob and Kathy Cushing
