To Whom It May Concern:

I would like to take the time to express my confidence for and appreciation to Northern Precision, Inc. They were our contractor in a construction project in Venice, Florida. In this process they did a demolition on an existing residence, worked with us on the design of a new residence, walked us through the permitting process and did the construction of a 4200+ beautiful British West Indies vacation home.

Tom Marovich, Matt, Brian and the rest of their associates did a wonderful job during this process. Our family was absent owners during this process and Northern Precision kept us informed and in the loop on the process and when construction decisions were required. The quality of the construction was first-class.

I would highly recommend Northern Precision, Inc. for anyone's construction project. We continue to have a working relationship to this day.

Sincerely,

A handwritten signature in cursive script that reads "Steve Owens".
